PROFESSIONAL SUMMARY

Java Developer with expertise in Spring Boot, RESTful API development, and full-stack web technologies. Skilled in building scalable, production-ready applications using Java, Spring Boot, SQL, HTML, CSS, and JavaScript. Adept at designing backend services, integrating databases, and delivering clean, maintainable code. Seeking an entry-level Java/Spring Boot Developer role to contribute technical skills and grow within an agile team.

TECHNICAL SKILLS

- **Languages:** Java (Core & Advanced), SQL
- **Frameworks:** Spring Boot, Spring Data JPA, RESTful APIs
- **Web:** HTML5, CSS3, JavaScript (Basics)
- **Database:** MySQL, SQL (DDL, DML, Joins)
- **Concepts:** OOP, Data Structures, CRUD, REST API Design
- **Tools:** IntelliJ IDEA, Git, GitHub, Postman, Maven

INTERNSHIP

Java Developer Intern *Fantasy Solution*

- Developed backend modules using Java and Spring Boot for an enterprise web application project.
- Built a Todo List Application with full CRUD functionality using Spring Boot REST APIs, Spring Data JPA, and MySQL.
- Wrote optimized SQL queries, consumed RESTful APIs, and maintained project structure using Maven and Git.
- Collaborated in an agile environment, participated in code reviews, and improved overall application performance.

PROJECTS

Predictive Maintenance System for Equipment Monitoring *Academic Project*

- Built a Java-based system to analyze equipment sensor data, predict failures, and generate maintenance alerts using SQL.
- Implemented threshold-based alerts that notify when sensors detect high temperature, with plans to integrate a machine learning model in the future.

Employee Management System *Academic Project*

- Developed a Spring Boot web application with RESTful APIs to manage employees and assign tasks to individual employees.
- Implemented task assignment, status tracking (Pending/In-Progress/Completed), and employee-wise task views using Spring Data JPA and MySQL.
